

flexible. scalable. powerful.

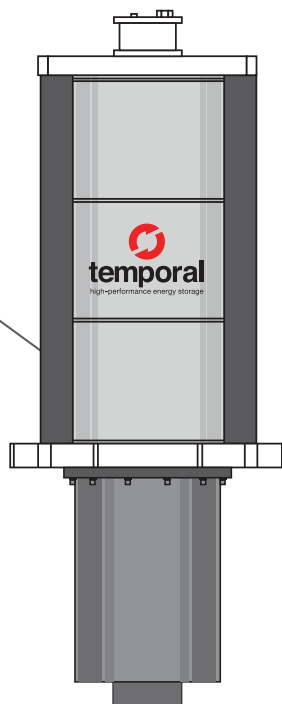

technical specifications: 10-flywheel temporal module

energy capacity	500 kWh		
power rating (10 flywheel module)	+/- 5 MW	+/- 2 MW	+/- 1 MW
max. duration at rated power	6 mins	15 mins	30 mins
footprint	600 square meters		
Options			
housing configurations	building or outdoor		
existing and customized control system	available		
communications	etherCAT, modbus, others		
remote monitoring	available		
low voltage ride through (LVRT)	available		
var support	available		
integrated UPS	available		

applications

10-flywheel module

POWER RATING	+/- 5MW
Nº. OF FLYWHEELS	10

grid balancing

isolated grids

renewables integration
